"Algoa Grown" Trees

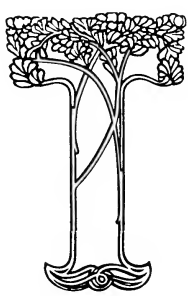

SPECIAL PRICE LIST

OF

SUCCESSORS TO

ALGOA FRUIT & NURSERY COMPANY

C. W. MINSON, MANAGER
ALGOA, TEXAS

GRAND CLOSING OUT SALE

**AN EXCEPTIONAL OPPORTUNITY TO SECURE
FIRST CLASS STOCK AT AN
EXTREMELY LOW PRICE**

Plant "Algoa Grown" Trees

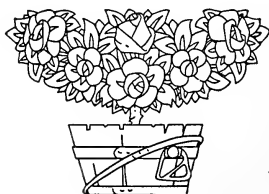

Having decided to discontinue the Nursery Business, we offer herein our entire line of stock in standard varieties and grades direct to Planters and Growers at a price that has seldom if ever been quoted on stock of such class and quality before.

Our entire stock, comprising ORANGE, POMELO, KUMQUAT, TANGERINE, miscellaneous Fruit Trees, FIGS, SHADES, SHRUBS, AND ORNAMENTALS, must go this season, and we have cut the price on all grades and varieties to such an extent that it offers an exceptional opportunity to every one to secure stock for this season's planting at a ridiculously low price.

Bear in mind that the stock offered herein represents the best varieties in the various kinds, and is guaranteed to be strictly as represented. This is not an attempt to dispose of inferior stock at a bargain price, as our trees are first-class in every respect, and poor stock is expensive as a gift.

We invite inspection of our stock by our customers, and will meet same at station, if notified in time.

All stock offered has been inspected by the State Inspector of Orchards and Nurseries, and copy of Certificate of Inspection will accompany all orders.

Plant "ALGOA GROWN" Trees

TERMS AND CONDITIONS.

We invite inspection of our stock by our customers, and will meet all at station if notified in time.

Club orders among neighbors of a community are often advisable, as by clubbing together and having all orders shipped to one party a substantial saving can be made account of larger number of trees ordered.

We book all orders with the distinct understanding that we shall not be held liable for injury or loss of stock from frost, hail, fire or other causes over which we have no control. We are not liable for delays in transit, and our responsibility ceases upon delivery to transportation company. All orders for stock are accepted subject to supply on date received.

We guarantee all stock to be true to name and free from disease, and agree to replace, upon proper proof, any stock that may be found otherwise, or refund the amount paid for same; but it is mutually agreed between the purchaser and ourselves that we shall not be liable for a greater amount than the purchase price.

All stock is carefully dug, graded and packed. We make no extra charge for packing. We do not pay transportation charges, but deliver f. o. b. Algoa.

Five, fifty and one hundred trees of one class take ten, hundred and thousand rates, except on long lists of a few trees of many varieties.

It is not practicable to ship stock by mail, as only very small sizes can be conveniently packed to be shipped by that method.

In ordering, please give name and address plainly, and state whether stock is to be shipped by freight or express. Where no instructions are given, we will use our best judgment. If freight and express office is different from postoffice address, do not fail to mention same.

Terms: Cash with order if for immediate shipment. On orders to be held for future shipment, we require 25 per cent cash with order, balance before shipment is made.

Remittances can be made by Registered Letter, Money Order, Bank Draft or Check.

Our shipping season usually opens about November 15th and continues until last of March.

Oranges and Other Citrus Fruit Trees

We have over 100,000 in nursery rows, mostly two and three-year-old trees that are as fine as skill and experience can produce.

Every tree has been grown from buds selected from orchard bearing trees showing best general characteristics as regards growth, yield and quality of fruit, and are guaranteed true to name and free from disease.

ALL OF OUR CITRUS FRUIT TREES ARE BUDDED ON GENUINE CITRUS TRIFOLIATA STOCKS.

VARIETIES.

SATSUMA ORANGE—Seedless; form, oblate, medium size; color, yellow; meat, fine grained, sweet; juice, abundant; rind, thin, easily removed; ripens October. This is the best edible and commercial variety for planting on the coast. A prolific, hardy and early ripening variety of superior quality, it combines wonderful productiveness with the ability to withstand a very low temperature.

DUGAT—A fine orange of the Louisiana Sweet type. Trees rapid and vigorous growers. Fruit medium size, round, and extremely juicy and well flavored. One of the hardiest varieties and well worthy of planting.

DUNCAN POMELO—Probably the hardiest variety grown, and a universal favorite. Trees vigorous and upright in growth, bearing large, well-formed and fine quality fruit.

MARSH SEEDLESS—One of the best and hardiest varieties. Fruit excellent in quality, practically seedless, and a fine shipper.

GILLETT'S LATE—One of the best late varieties.

NAGAMI KUMQUAT—Oblong shape, and extremely productive. Stands cold equally as well as the hardiest of orange trees, and is a prolific bearer of beautiful, agreeable-tasting fruit.

DANCY'S TANGERINE—A very hardy and prolific grower, producing great quantities of juicy fruit. Kid glove variety, of good flavor, and will give satisfaction.

Magnolia Figs

The Magnolia is a large greenish yellow or amber colored fig, which for preserving, pickling, jam and other finished products can not be excelled.

This variety is justly entitled to its well earned reputation as the best fig for commercial planting, and has practically superseded all other varieties for that purpose on the coast.

The available supply of stock of this variety is limited this season, due to adverse weather conditions, but we are able to offer several thousand fine, well-rooted trees.

Shade Trees

ASH—A very desirable and hardy shade tree; excellent for park or street planting.

CATALPA SPECIOSA—An extremely rapid growing flowering tree; valuable for lasting quality of timber. Used extensively for posts and railroad ties.

COTTONWOOD—Very rapid growing and desirable shade tree. Forms a fine top and thrives in most all soils.

ELM—A graceful and stately tree. Popular for street planting.

HACKBERRY—A fine quick growing and hardy shade tree for yard or street planting.

LOCUST—A vigorous growing tree of medium height.

SILVER MAPLE—A beautiful shade tree which attains large size. Foliage bright green on top, silvery white underneath.

RED OAK—A good dry land variety. Large leaves, turning scarlet in fall.

LIVE OAK—One of the finest oaks for Southern planting. Makes a beautiful shapely tree with deep green foliage.

POPLAR LOMBARDY—A very straight, upright and rapid growing tree that will grow well under most adverse conditions.

POPLAR SILVER—A rapid growing tree which makes a good head. Leaves broad, and silvery color on underside.

SYCAMORE—A very fine quick growing tree, attaining large size, and making a large spread. One of the best and most popular shade trees.

TULIP—A beautiful ornamental tree. Broad green leaves, and bears flowers of a beautiful yellow.

TEXAS UMBRELLA—None excel this variety for quick growth. Forms a beautiful symmetrical head with very dense foliage, affording an abundance of shade.

RED CEDAR—A beautiful evergreen of rather slow growth, but very attractive.

SWEET GUM—A very handsome tree of fine form and foliage. A valuable tree for park and street planting.

JAPAN VARNISH—A very rapid growing ornamental shade tree, bearing white flowers. Smooth green bark resembling the Sycamore.

CAMPHOR—A handsome evergreen suitable for shade, hedge or wind-break. Very hardy and vigorous, compact, and beautiful foliage.

MAGNOLIA GRANDE FLORA—Beautiful flowering evergreen tree; leaves, large and bright green; flowers, waxy white, and eight to ten inches across.

CRYPTOMERIA JAPONICA (JAPANESE CEDAR)—A very graceful evergreen tree that attains large size.

It is generally advisable in transplanting some evergreens to have plants dug with a ball of earth and burlapped. We recommend that Camphor, Crypt. Japonica, Mag. G. F. and Cedar, as well as other varieties when balled prices are quoted, be dug in that manner, especially in the larger grades, and price trees of varieties named both for balled and bare roots.

CAMPHOR—Single Standard, Headed, Not Balled.

2-yr. 3 to 4 ft.	\$.40	3.50	30.00	250.00

Vines, Hedge Plants and Ornamental Shrubs

EUNOYMOUS JAPONICA—Bright green leaved evergreen, suitable for hedge or ornamental planting.

CALIFORNA PRIVET—Makes a dense hedge and can be pruned to any desired form.

CRAPE MYRTLE, Red and Pink—Beautiful flowering deciduous shrubs. Will make small trees 15 to 20 ft. in height. Very hardy, adapted to a wide range of soils, and one of the most satisfactory ornamentals for general planting.

ALTHEA—An easily grown and beautiful ornamental. Bears flowers most of the summer.

FLOWERING POMEGRANATE—Suitable for hedges and ornamental planting, and produces beautifully shaded red and pink flowers throughout the summer.

DEUTZIA—A desirable white flowering shrub.

OLEANDER, Red and White—Free blooming evergreen shrub, adapted to outdoor culture. Long pointed leaves and showy flowers, they make a valuable addition to any lawn.

WISTERIA, Chinese Blue—A very strong and rapid growing vine, producing large pointed clusters of fragrant flowers.

HONEYSUCKLE, White—A dense growing vine, suitable for porches or trellis.

CAPE JASMINE—A beautiful plant with waxy green leaves, and bearing a profusion of beautiful white flowers.
